

Critical Sustainability (Technical University Berlin)

Name of Module/Course		Critical Sustainability		
Short description		The integrated course is a common course for students of all disciplines. It conveys the theoretical foundations of the term sustainability as well as the interrelationships between technology, nature, the individual, society and democracy. Through the interactive design, the participants question and discuss the knowledge imparted. There is an exchange about different aspects of sustainability related to the different disciplines of the participants

6 ECTS		16 meetings for 2 hours/120 minutes each		
Start & end dates, WS		Start & end dates, SS	Other timeslot (block course):	
		13.4. 8.6.2021	Tuesdays + Thursdays, 14.00 – 16.00 CET	
Registration until		Number of possible AGEP participants		
Attend first meeting		10		
Content and goals of qualification	<p>Skills are acquired for the concept of "Education for Sustainable Development". The participants bring their own topics / problems into the course and help shape it independently. At the same time, students are encouraged to have a lasting impact on society.</p> <p>The complexity of the term sustainability is analyzed and existing assumptions are questioned. Conflicts of value and goals are found individually and create the basis for a contribution to social-ecological transformation.</p>
