

Risk Management in the Context of Climate Change (United Nations University Bonn)

Name of Module	Module JM8 – Risk Management in the Context of Climate Change			
Name of Programme	Geography of Environmental Risks and Human Security (Joint M.Sc. programme in cooperation with Uni Bonn/Department of Geography)			
Name of University	United Nations University (Institute for Environment and Human Security)			
Name of Lecturer	Lecturers from UNU-EHS' Environment and Migration (EMIC) & Munich Climate Insurance Initiative (MCI) sections.			
Responsible University lecturer	Dr. Kees van der Geest , Michael Zissener			
Credit Points	SWS	Attendance (h)	Self-study (h)	Total workload (h)
6	2			180
Start & end dates, WS	Start & end dates, SS		Other timeslot (block course):	
Please check the website	Please check the website		Please check the website	
Registration between	Number of possible AGEP participants			
Please check the website	5 AGEP network students			
Content and goals of qualification	The lecture will introduce important international policy making processes and frameworks (UNFCCC, Sendai, SDGs, G7, G20 etc.) and the way these address and drive key issues in the context of climate change risk management. UNU-EHS lecturers and external experts will provide participants with insights in conceptual understanding around the theoretical basis of topics such as Loss & Damage, Environmental Migration, Livelihood Resilience, and Climate Risk Insurance. Students will get practical understanding of the complexity of these concepts' application on the ground. The course delivery will be complemented by case studies as well as exercises.			
Preconditions for participation	none			
Teaching Methods	Seminar			
Lesson format (online/face-to-face)	Depending on possibilities under the current pandemic situation, to be delivered either in person or via remote or blended learning.			
Assessment method	Essay & presentation			
Language	English
