1.3.4. Data Analysis in R – Beginners Course (Cologne University of Applied Sciences)

| Name of Module | | Data Analysis in R - Beginners Course | | | | | |
|--|---|--|------|--|----------------|--------------------|--|
| Short description | | In this course you will learn a programming language and how to work with large amounts of data. Not only will these skills increase the possibilities for what you can achieve in your studies, they are increasingly becoming a requirement to gain employment in many fields. They provide you numerous opportunities for the modern day professional work. This course teaches how to use The R Project for Statistical Computing (commonly known as "R") for data analysis, focusing on the processing and analysis of spatial and temporal datasets. The intensive course starts at a beginner level and moves to an intermediate level. Please note that the course uses examples and data analysis techniques in the fields of climate, geography and hydrology , and it is therefore recommend that students in master's courses related to these topics attend. | | | | | |

| Content and goals of qualification | Objective: for students to obtain and implement the skills to undertake geospatial data analysis using the R Project for Statistical Computing. Module 1: Introduction to R part I 1. What is R? 2. R and Rstudio 3. R commands 4. Assignment, vectors and sequences 5. Missing values 6. Index vectors 7. Objects and their modes and attributes 8. Arrays and matrices 9. Lists and data frames 10. Scripts and packages 11. Basic functions 12. Arithmetic operators | | | | | | |
| | Module 2: Introduction to R part II | | | | | | |

| | 4 Incorrection on all compatible matches | | | | |
|------------------|--|--|--|--|--|
| | Importing and exporting data Basic plotting | | | | |
| | Basic plotting Relational operators | | | | |
| | 4. Iterative processes | | | | |
| | | | | | |
| | Module 3: Raster files and spatial data | | | | |
| | 1. Importing and plotting vector data | | | | |
| | 2. Extract specific spatial information using vector data | | | | |
| | 3. Importing gridded datasets with different formats | | | | |
| | 4. Manipulation of gridded datasets | | | | |
| | 5. Exporting gridded datasets in different formats | | | | |
| | 6. Manipulation of values in gridded data | | | | |
| | Module 4: Satial data processing | | | | |
| | 1. Data organisation | | | | |
| | 2. Accessing and importing particular files | | | | |
| | 3. Pre-processing data | | | | |
| | 4. Aggregating data | | | | |
| | 5. Generation of time series from gridded datasets | | | | |
| | 6. Extra Considerations | | | | |
| | Module 5: Spatial and temporal statistics | | | | |
| | 1. Raster statistics | | | | |
| | a. Minimum, maximum, mean, standard deviation, sum | | | | |
| | b. Frequency of cells in a raster | | | | |
| | c. Writing derived values as a time series | | | | |
| | 2. Example: Raster statistics over an area | | | | |
| | a. Calculating mean P and ETa over an area | | | | |
| | b. Analysing P minus ETa patterns | | | | |
| | | | | | |
| | Module 6: Automating downloading | | | | |
| | Web crawling with R Iterative functions | | | | |
| | 3. Downloading Products trough ftps | | | | |
| | 4. Downloading Products trough https | | | | |
| | Basic knowledge of statistics | | | | |
| Preconditions | Dasic Kilowieuge of Statistics | | | | |
| | | | | | |
| Teaching | Online, via Zoom | | | | |
| Methods | | | | | |
| Wethous | | | | | |
| Lesson format | The format will be online and includes: | | | | |
| | 1. Lectures | | | | |
| (online/face-to- | 2. Exercises | | | | |
| face) | 3. Data and scripts to reproduce examples and solve the exercises | | | | |
| | 4. Questions and Answer (Q&A) sessions | | | | |
| | T. Questions and Answer (QuA) sessions | | | | |
| | None | | | | |
| Assessment | | | | | |
